PROFESSIONAL SUMMARY

Reliable IT support professional with hands-on experience delivering first-line technical support for hardware, software, connectivity and user-access issues in fast-paced environments. Skilled in Windows 10/11, Active Directory and Microsoft 365 support, remote troubleshooting, ticket triage and SLA-focused incident management. Recognised for clear communication with technical and non-technical users, careful handling of sensitive data, and a calm, methodical approach to resolving issues and escalating when appropriate.

CORE IT SUPPORT SKILLS

- First-line hardware and software support for laptops, desktops, printers and peripherals
- Windows 10/11 installation, configuration and troubleshooting
- Active Directory: user provisioning, password resets and permissions management
- Microsoft 365 setup and end-user support
- Remote technical support and clear communication with technical and non-technical users
- ITSM ticketing and incident management: Salesforce, Jira Service Management and ServiceNow
- Ticket triage, prioritisation, SLA monitoring and escalation to internal specialist teams
- Basic network and connectivity troubleshooting; device setup, configuration and onboarding
- Data-security, privacy and compliance awareness when handling sensitive information

RELEVANT IT EXPERIENCE

IT Support Engineer
03/2026 - 10/2026

Taylor-Marriott Ltd, Birmingham, United Kingdom

- Took ownership of the company's IT systems, installing, configuring and maintaining hardware and software to support staff and day-to-day digital project work.
- Set up and managed user accounts and access permissions, handling onboarding and offboarding and ensuring staff had the right access to the systems they needed.
- Provided first- and second-line IT support to staff, resolving hardware, software and connectivity issues and guiding users on best practice.
- Liaised with third-party suppliers and service providers to resolve issues and keep systems and services running reliably.
- Identified recurring issues and helped improve IT support processes and documentation.

Career break
04/2025 - 02/2026

Technical Support Analyst
08/2023 - 03/2025

Trakm8 Ltd, United Kingdom

- Diagnosed and resolved hardware faults, connectivity issues and data-reporting problems using internal diagnostic tools, identifying root causes and applying effective fixes.
- Provided remote technical support to enterprise customers, communicating practical solutions clearly by phone and through support channels.
- Logged, triaged and managed incidents and service requests in Salesforce and Jira, consistently working to resolution SLAs.
- Escalated and relayed issues to internal teams when needed, helping to maintain service continuity and support ongoing service improvements.

Technical Support Engineer
01/2019 - 05/2020

DXC Technology, India

- Delivered high-volume first-line IT support in a global enterprise environment, managing incidents and service requests daily.
- Administered end-user accounts in Active Directory, including user provisioning, password resets and access permissions.
- Supported users with remote desktop access, system connectivity and device-level issues while maintaining a calm, professional approach.

- Handled sensitive information in line with strict data-security, privacy and compliance requirements.
